A Guide to Yankee Permaculture Publications: 1983-2010

(Third edition - 10/27/09)

Availability subject to change without notice.

Since 1983, Yankee Permaculture has published journals, newsletters, papers, and pamphlets on many aspects of permaculture. Our goal has been to fill the gaps in existing permaculture literature, to pull together and/or better express information otherwise not available in useful form, and to extend the development of permaculture as a concept and movement. Much of the material we have published has been in direct response to needs we perceived in our teaching of the Elfin Permaculture Design Course as well as permaculture workshops and lectures.

We believe that these writings of more than 25 years increase in usefulness as time goes on. Meanwhile, thousands of people new to permaculture do not learn about this useful information. Therefore, we have assembled a summary of these writings by topics. We have skipped items of diminished relevance because they dated. We hope that you find this list useful. Ordering information is located in the Yankee Permaculture Order Form.

We have discontinued offerings from our former Special Order Catalog (Yankee Permaculture Paper #27.) We continue to list the some of these materials because the information is out there somewhere if you look hard enough.

Comments on the organization of the tables below are included at the end of this document.

We strive to make the information below complete and correct. If you find omissions or errors, please let us know. The number of pages indicated for an article or publication may change in some cases as we update information and/or convert documents from typescript to computer typesetting. Most of such work is done by volunteers. Feel free to step up and help!

Some of these documents are also available on the **Elfin Permaculture Design Course Online CD**, which is available in a self-study version for people not registered in our annual online course. The **CD** contains about 400 items, some strictly dealing with the mechanics of the course, most containing learning exercises, information, and resources such as databases. We have no plans to develop a contents list of the **CD** unless a volunteer steps forward from among our students and monitors.

OUT OF PRINT: The following are out of print in hard copy. In some cases we have scanned them for distribution on CD. In others, obtaining a copy requires waiting until we can scan the document. We set price for scanned documents after someone expresses interest.

- **TIPSY #1,**
- **TIPS Vol. I, No. 2,**
- **All newsletters (Robin, Prod, etc.)**

We are phasing out hard copy of pamphlets and papers. Paper copies of scanned documents, where not priced, will cost \$1/page in black and white or \$2/page if any color is involved anywhere in the document. (You can ask for it in black and white only.) We will quote rates for bulk copies at short run prices.

Explanation of Codes and Notations

PUBLICATIONS:

TIPSY=*The International Permaculture Seed (or Species) Yearbook*. The following volume numbers correspond to the years indicated. **TIPSY 1**=1983; **TIPSY 2**=1984, **TIPSY 3**=1985, **TIPSY 4**=1986.

TIPS=*The International Permaculture Solutions Journal*. **TIPS I, 1**=TIPS, Volume I, Number 1, and so forth.

Robin=*Robin Newsletter*. **Robin I, 1**=*Robin Newsletter*, Volume I, Number 1, and so forth. **No longer in print.** We will scan issues on a custom basis for inclusion on a CD.

YPC Paper refers to Yankee Permaculture Papers. **YPC 1**=Yankee Permaculture Paper #1, and so forth.

Special Order refers to papers listed in the Yankee Permaculture Special Order Catalog, Yankee Permaculture Paper #27. **Special Order 1**= Special Order Paper #1. **Service discontinued. Available only in response to special needs at our discretion.**

PDC Pamphlet refers to the Permaculture Design Course Pamphlet series. The Roman numeral following indicates the corresponding number of the pamphlet. **PDC Pamphlet I**=Permaculture Design Course Pamphlet #1, and so forth. All Permaculture Design Course Pamphlets are in the public domain and may be freely reprinted.

TITLE

Insofar as practical, we have listed the exact title of the publication.

We list only the first initial of the author so that we do not have to go to a smaller, harder-to-read typeface. If you recognize the author's full name, you'll probably recognize it in this form. If not, it doesn't matter.

In a few cases, where a number of authors are involved, we list only the first with "et al" indicating that there's a bunch more. Some materials have no author listed or are the product of such a collective effort so no author is listed.

PAGES

Where we are listing an article, as inside a journal or other publication, we indicate the page number(s) where the article can be found. Where we are listing the entire document, as with a Permaculture Paper, we list the total number of pages, exclusive of promotional material. Where articles have been published in more than one place, we usually list only the publication that is most complete and useful.

COMMENTS

The comments can add any kind of information. In some cases, we use the comment as a keyword, indicating that the publication cited also fits another category. For example, although we have listed "A Place of Abundance" under Permaculture: Philosophy and Basics, it also fits under "Useful Plants" so we wrote "Useful Plants" in the comments box. It will be obvious to people familiar with permaculture that it is almost impossible to fit a good permaculture article into just one category because permaculture is wholistic.

Certain comments are regarded as particularly important. These are in bold type. Since the comments box is small, they any other comments we might have listed. The bold type comments have the following meanings:

Public domain means simply that the publication has been placed in the public domain for all to reprint as they see fit, without need for royalties or permission.

Yankee Permaculture Articles

8

Species list indicates that this article has a species list. Generally, these are compact and particularly useful forms of providing information. **Resource list** indicates that the publication lists useful suppliers, organizations and/or publications.

Print/disk indicates that the publication is available in both conventional print form as well as on compact disk. **Disk** or **Print** alone indicates that publication is available in only the corresponding format. We do have a scanner, and can enter many documents on disk, however the cost will reflect that the process is time consuming and involves expensive equipment. **We are phasing out hard copy in favor of CDs.**

All articles from TIPS Vol. II onward are available as offprints. Buying individual offprints, which are printed out on a custom basis, may not make financial sense compared to buying the entire issue. Much better rates are available in bulk print runs. Other uses of individual articles should be negotiated with the author. Printing from our CD is proscribed.

SPECIAL NOTE: Not included in this list for the most part are book reviews, organization reviews, and letters to the editor.
